Who is Johannes Kepler, the profound mathematician of the world mysteries

Who is this profound man who, with his penetrating sense of the mathematical order of the world, solved many practical problems of everyday human life and laid the foundation for today's astronomical world?

An entertaining and multi-layered portrait of the life of the astronomer and mathematician who explored the mysteries of the world.

Ernst Bindel (1890—1974) studied mathematics, physics and chemistry in Göttingen, Berlin and Halle. He was a teacher at the Waldorf School Uhlandshöhe in Stuttgart and is the author of several books published by Freies Geistesleben.
