Radiant colors and ornamental patterns: with the folding technique developed by the author, the most beautiful window stars and flowers are made from colored tissue paper. With easily understandable steps, Frédérique Guéret introduces the readers to a folding technique of her magical models - each a transparent work of art. The models are divided into different level of difficulties so that beginners as well as advanced learners find appropriate suggestions.

- Bright window decorations for all seasons.
- Special colour effects through watercolour technique.
- With clear step-by-step instructions.
- Different levels of difficulty for beginners and advanced artists.

Frédérique Guéret, born in Aix-les-Bains in 1949, worked in a Paris advertising agency until 1980. Today she lives in Stuttgart, where she completed a painting and drawing training. Out of her diverse interests, she developed her own, lively method in the art of folding with tissue paper.
