### Carving and doing woodwork for beginners and advanced.

A comprehensive introduction to all those who like to work with wood: containing all important techniques for carving, rasping and carpenter work and plenty of creative design ideas: from building a simple key fob to a challenging furniture. With the help of precise instructions via text and photographs, you can manufacture many nice wooden basic commodities and unusual things for yourself and your children.

Working with wood and facturing furnitures, accessories, pretty and useful objects by yourself is a extraordinarily creative activity. For that, Helmut Hinrichsen provides many suggestions and introduces more than 30 projects in all difficulty levels. Having step-by-step-pictures and detailed instructions, this book is an ideal introduction for beginners and a rich source for advanced people, for it contains fancy and unusual design ideas. Many objects can be created together with children and adolescents and the author always additionally shows practical alternatives of woodwork, for not everyone can be assumed to own a work bench. An informative annex explains important pedagogical aspects of training your senses and improve your motoric abilities.

**Helmut Hinrichsen** was born in 1950, trained as an agriculturalist and then studied Waldorf Education in Witten/Annen. He taught handicrafts and biology at the Waldorf School in Kiel for many years and was also a counselling teacher for addiction and drug prevention. He is currently a lecturer at the Waldorf teacher training seminar in Kiel and at the Alanus-Hochschule Alfter.
