Natürliches und Schönes für die erste Zeit

with photographs and instructions.

160 p., hardcover, continuously coloured.

ISBN 987-3-7725-2856-9

All rights available

- **Beautiful and loving ideas all around babies that can be done by oneself.**
- **For all parents-to-be who are searching for something special.**

„Be mindful!“ – these words became the author’s, illustrator’s, nature pedagogue’s and mother of four children’s attitude towards life. Due to that, the projects in her book are illustrated lovingly and mindfully. Prevalently created from natural and recycling materials, the readers are able to create those objects on their own. They are beautiful, individual, ecological and cheap – and, above all, wonderful for babies and their parents.

Caroline Hosmann was born in Vienna. After graduating from school, she went out into the wide world and used her training as a hotel manageress and marketing studies to get to know the USA, France and Australia, among other places. Now, however, she has settled in the south of Munich with her husband and four children for a few years, works as an author and calls herself a "satisfied country bumpkin". With her NATURE CHILDREN group she is out and about in nature all year round and reports about it on her successful blog www.naturkinder.com.
