A new way to understand the flora.

By subtle examinations of flowers and by tracing psychical moods, Ernst-Michael Kranich shows that colours, forms and gestures of the flora correspond to human feelings. This creates a view of a world in which humans and nature internally belong together. Due to the impressive colour photographs you can get even closer to the plants.

"This book can be warmly recommended to anyone who is willing to open up a new path to the essence of nature".

Der Merkurstab

Ernst Michael Kranich, 1929 - 2007, studied biology, palaeontology, geology and chemistry. He was a teacher of natural science at a Waldorf school and then worked for more than 45 years in the training of Waldorf teachers at the Seminar for Waldorf Education in Stuttgart. Numerous books by E.-M. Kranich on scientific and educational topics have been published by Verlag Freies Geistesleben.
